Jun 2025 About My Portfolio

Welcome to my personal portfolio!I'm a passionate and aspiring developer and tech enthusiast, dedicated to building clean,functional, and user-friendly web applications. My portfolio .showcases the practical skills I've developed through hands-on projects and participation in real-world tech challenges.

Key highlights of my portfolio include:

✅ Netflix Clone Website: Built during GUVI's Buildathon, this project demonstrates my ability to replicate real-world applications using front-end technologies, responsive design,and a focus on seamless user experience.

✅ Local Service Finder App (Mini Project): Currently developing a service-based application that connects users with local professionals like plumbers, electricians, and carpenters. This project highlights my problem-solving skills and understanding of app development for community impact.Each project reflects my commitment to learning by building, and my desire to create tools that solve real problems. Whether it's cloning a global platform or developing a local solution, I strive for clean code, effective functionality, and meaningful user experiences.

SKILLS

Python
Excel
Gitup

EXTRA CURRICULAR ACTIVITIES

->Participated in GUVI's Buildathon, where I successfully developed a Netflix clone website using modern web technologies. This experience enhanced my front-end and back-end development skills.
->Currently working on a college mini project titled "Local Service App", which helps users easily find nearby service professionals like plumbers, electricians, carpenters, etc. The app aims to bridge the gap between service providers and customers
